EDUCATION

The University of Texas at Austin

Master of Science - Computer Science - GPA: 3.78

Austin, TX

Aug. 2023 – Present

Connecticut College

Bachelor of Arts - Majors: Computer Science, Mathematics, Physics - GPA: 3.99

New London, CT

Aug. 2018 – May 2022

EXPERIENCE

Software Engineer

ThayerMahan, Inc

June 2022 – Present

Groton, CT

- Develop frontend and backend aspects of company's software for three major repositories
- Contribute to migrating thousands of lines of JavaScript to TypeScript to reduce tech-debt
- Augment user interface to support data visualization features that are highly requested by customers
- Introduce type safety and functional programming concepts to codebase

DevOps Engineer Intern

Nuance Communications, Inc

June 2021 – August 2021

Birmingham, MA

- Selected for internship in elite cloud computing infrastructure team, noticed team's low security score of 20%
- Created pull requests on Docker and Kubernetes files and Python scripts, eliminated 20+ security vulnerabilities
- Fortified team's security score from 20% to 75%, braced team's infrastructure for the 2022 Microsoft acquisition
- Acquired skills in 10+ tools/methodologies (ex. Azure DevOps, Docker, Kubernetes, Helm, Git, Agile workflow)

Math Help Center Tutor, Computer Science TA

Connecticut College's Academic Resource Center

August 2019 – May 2022

New London, CT

- Tutored 8 math classes and 3 upper-level computer science classes (Algorithms, AI, Computational Intelligence)
- Designed and implemented creative strategies to familiarize students with particularly difficult concepts
- Determined student's knowledge level, identified areas of weakness, offered extra 1-on-1 help for struggling students
- Appointed as manager of MHC in junior year, optimized MHC to cope with COVID lockdown, scheduled 4 weekly tutoring sessions, informed professors of struggling students, provided mentorship to new math tutors

PROJECTS

Cynthia | Python, Pytorch

March 2023 – Present

- Reinforcement learning in Pokemon Showdown
- blah
- blah
- blah

Showdown Environment | Python

March 2023 – October 2023

- RL environment for Pokemon Showdown
- blah
- blah
- blah

Undergraduate Research | Haskell

August 2020 – February 2023

- Conducted independent AI research with Professor Gary B. Parker through research seminars and honors studies
- Built 6 parallel genetic algorithms to evolve teams of neural network agents to generate optimal hexapod gaits
- Utilized math and physics knowledge to design efficient and accurate hexapod simulation
- Wrote over 1100 lines of code in Haskell, learned modern functional programming techniques
- Authored honors thesis titled "Using Multi-Agent Learning to Achieve Emergent Decentralized Hexapod Gait"
- Coauthored and published "Coevolving Hexapod Legs to Generate Tripod Legs" to ICAART 2023 conference

TECHNICAL SKILLS

Languages: Python/Mojo, Rust, Haskell, Java, JavaScript/TypeScript, HTML/CSS, Mathematica

Frameworks: Angular, Node.js

Developer Tools: Linux, Git, VSCode, Docker, AWS

Libraries: Pytorch, NumPy, Matplotlib, pandas
